

Week 1 Worm Farm

One of our first activities this term was to create a worm farm. The children helped construct our 'Can of Worms', following the steps required to make the stand and then adding the various elements to create a home for the worms.

Before the worms were put into their new homes, we read a book about worms, and then using magnifying glasses and gentle, clean hands, the children investigated worms closely. It was interesting to see some students engage eagerly and others not want to touch or observe the wriggly worms.

We now feed the worms the scraps from our fruit bowls and occasionally check to see if they are busy eating it all. In a few months we hope we have collected enough worm 'tea' to fertilise our garden – which we will be planning shortly.
